BE 16CO	1400	50,000	2800	100,000	-	-	1,183.00

Power supply 230V/1PH/50Hz. Alternative 110V, headed, oil free and aggressive condensate drains are available on request. The capacity volumes stated for dryers and filters assume that condensate has already been removed at the receiver stage. Prices for BE series of Electronic Drains includes Installation Kit comprising connection kit, discharge kit, wall and floor bracket (excluding BE31 and BE32 models).

Capabilities are based on Rotary Screw Compressors operating with Mineral Oil in standard conditions. Different flow rates apply when using Synthetic Oils – Refer to HPC for full technical information. Heated and special application units available on request – On ES models 'TI' indicates 'Threaded Inlet'.

*IMPORTANT - Please Note: 15 bar RM, SXC, AIRCENTER and AIRCENTER SFC models are on application
